

PAPER MILL DUINO, MONDI ITALY

Mondi has acquired the Duino mill near Trieste (Italy) from Burgo Group. The mill currently operates one paper machine producing lightweight coated mechanical paper. Mondi plans to convert this paper machine to produce around 420,000 tonnes per annum of high-quality recycled containerboard for an estimated investment of around €200 million.

On behalf of Mondi, convex ZT GmbH is responsible for pre-engineering of the civil works required to realise the conversion.
